Joshua K Biju

Product Manager Intern - B2B SaaS & Developer Tools

joshuakbiju2345@gmail.com linkedin.com/in/joshuakbiju github.com/joshcodz

SUMMARY

Third-year B.Tech CSE student with a product management internship, club leadership experience and shipped technical projects. I specify, prioritise and prototype products in B2B SaaS and developer tools, from AI-assisted incident analysis (RootSignal) to repo onboarding analysis (Onboarding Friction Score). At AlienHouse Networks I turned unstructured workflows into internal product systems; at Founders Club, SRMIST, I grew from member to lead in 8 months running hackathons and campus events. Looking for a Summer 2027 product internship.

SKILLS

Product Management, Technical PM, PRDs, RICE Prioritisation, User Research, A/B Testing & Experimentation, Product Analytics (Google Analytics), Digital Marketing, Graphic Design, Node.js, Express, React, Next.js, TypeScript, PostgreSQL, Redis, Docker, REST APIs, LLM APIs (Gemini, Groq, Ollama), Git/GitHub

EXPERIENCE

Product Manager Intern — Remote

AlienHouse Networks 12/2025 - 04/2026

- Specified and drove an internal client-management system for ~8 team members, replacing unstructured workflows; cut client onboarding time from ~45 to ~15 minutes.
- Worked across marketing, hiring and technology teams to find operational gaps, turning them into structured deliverables and a 20-item prioritised backlog (RICE), scoped to the 6 features that covered ~80% of requests.
- Defined success metrics (adoption %, turnaround time) and improved client visibility with a client status tracker, used by ~6 people weekly.

Lead - Operations & Quality — Chennai, India

Founders Club, SRMIST 04/2026 - Present

- Own end-to-end execution quality for ~4 events per semester reaching ~500 students; built a pre-event checklist that lifted on-time readiness from ~60% to ~90%.
- Introduced post-event retros and a feedback form with a ~35% response rate across a team of ~10 volunteers.

Associate Lead — Chennai, India

Founders Club, SRMIST 01/2026 - 04/2026

- Co-coordinated the SRM Innovation Hackathon (Feb 2026, ~150 participants) and supported Foundathon 3.0, a 3-day, 10-track hackathon; owned registrations and participant check-in.

Operations & Marketing Member — Chennai, India

Founders Club, SRMIST 08/2025 - 01/2026

- Planned and ran social and digital campaigns to promote club events and drive participation, coordinating resources and cross-team execution with mentors and external partners.

PROJECTS & CASE STUDIES

RootSignal - AI Incident Root Cause Intelligence — Slack-integrated web app

- Built a Slack-first tool that correlates Sentry, Datadog, GitHub deploys and PagerDuty alerts to surface the likely cause of an incident in under 60 seconds, with confidence scoring and auto-generated post-mortems. Node.js, Next.js, PostgreSQL, Redis, Gemini + Groq.

Zenos - Browser-Based Operating System for Deep Work — React web app

- Built a React + Vite workspace that replaces scattered focus tools: ambient spaces, Zen Mode, a draggable widget system (Pomodoro, GitHub heatmap, code scratchpad, flashcards, todo) and a Cmd/Ctrl+K command palette, with layout persisted across sessions. Narrowed the target user from "everyone" to developers as the strongest wedge.

Second Habit - JioHotstar Retention Case Study (concept PRD) — 09/2026

- Diagnosed event-led churn (Hotstar subscribers fell from 61.3M to 40.4M, ~34%, in three quarters after IPL 2022) and proposed a season-end feature surfacing non-cricket content to cricket-only users via a homepage rail and post-match push.
- Defined the experiment (randomised holdout, Week-8 retention as primary metric, opt-out rate and live-match load time as guardrails) and rejected discounts and generic banners.

Onboarding Friction Score — In progress

- Scores a public GitHub repo by simulating a first-time contributor: an LLM parses setup steps and runs them in an isolated Docker sandbox to find where they get stuck (Node, Python, Go, Docker).

EDUCATION

B.Tech Computer Science & Engineering — 2024 - 2028

SRM Institute of Science and Technology, Chennai

Certifications: Product School (AI, Prioritization, Experimentation); GeeksforGeeks Product Management.
